**DETAILED ACTION**

1. The Restriction, mailed on 12/2/2005, has now been withdrawn. However, after carefully reviewing the response from applicant received on 4/4/2006 and the application, applicant is now required to elect a new single group for further examination with a new restriction as follows:

***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-11, drawn to a laser apparatus and a control unit, classified in class 372, subclass 29.02.
  - II. Claims 12-20, drawn to methods for tuning a laser, classified in class 372, subclass 38.01.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case the methods in Group II do not require a calibration memory with a control unit to store the optimum power ratio as claimed in Group I. Storing information can be implemented other recording format such as recording medium.
